

## Daylight Cleaning

- ▶ **saves energy**
- ▶ **creates a safer, healthier workplace**
- ▶ **makes us a more sustainable building**

**Daylight Cleaning** enables us to turn off most building lights at night, reducing energy use. This cuts greenhouse gas emissions and improves indoor air quality.

**Daylight Cleaning** uses sustainable products, equipment and procedures to improve the health of your indoor environment.

**Think and Act Green!**

## Do Your Part!

- ▶ **Recycle paper, plastic and glass items**
- ▶ **Turn off all lights and equipment daily**
- ▶ **Report spills and cleaning issues to <https://www.buildingengines.com/login>**
- ▶ **Wash hands after every restroom visit**

**Together, we will make a difference!**
